Brew-Venturing: North Carolina's Brewery Growth from 1990 - 2020

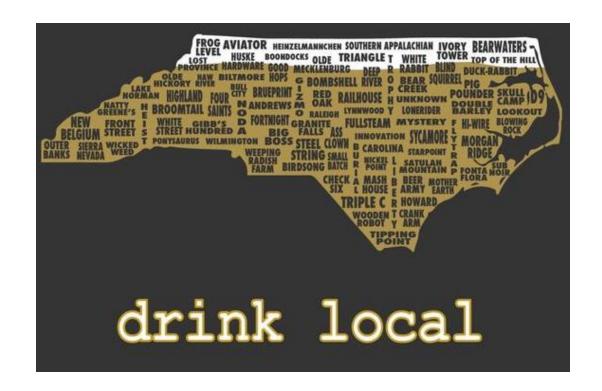

By: Jimmy Brawner, Jasmine Garcia, Michael Hargroder, Nathan Kosiba, and Chris Marchini

4/4/2020

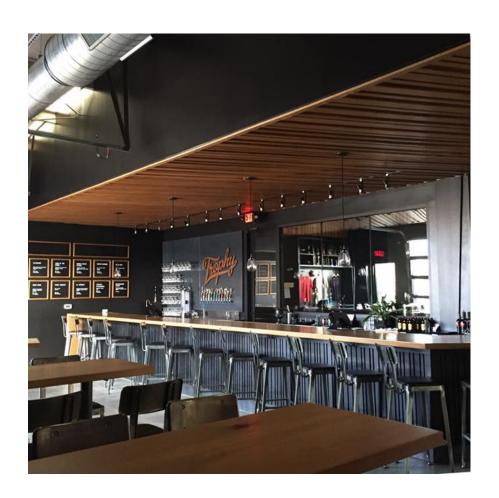

Key Objective

Analyze the history of brewing in North Carolina and create an interactive resource so viewers can see how local breweries in the Tar Heel State have grown over thirty years.

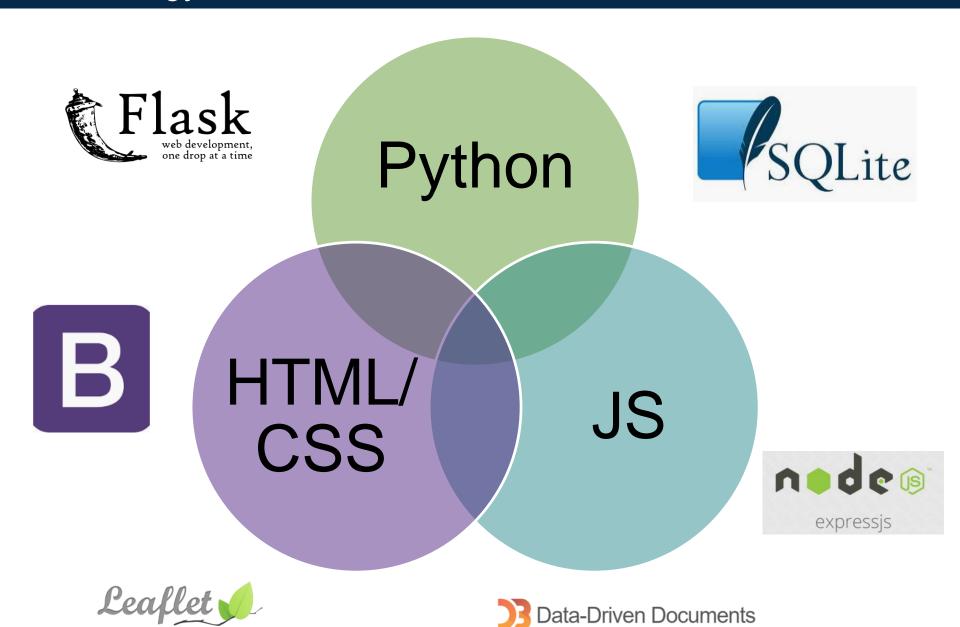

Why Look at NC Breweries?

- Craft beer a growing hobby
- # of breweries growing locally
- ETL project as starting point
- Want to identify when this trend picked up
- Create something interactive and actionable for decision makers

Technology

Data, Munging, and Coding Process

- 260+ brewery records due to the following sources:
 - NC Department of Commerce Business Data
 - Google Places API
 - Yelp API and Open Brewery DB (didn't use)
- Munging techniques and coding process
 - Flask server
 - SQLite server to store data
 - HTML/CSS for webpages
 - Leaflet for mapping
 - Data table to summarize

Brew-venturing app story...

Results Summary, Why this Matters, and Next Steps

- Breweries slowly grew from 1995 2007, took off after 2007, rapidly increased around 2014
- Growth in key areas such as Asheville, Charlotte, and the Triangle
- Can help new brewers identify where to set-up shop and consumers where to go
- Things we would like to try next:
 - See how employment changed
 - Add complementary businesses
 - Identify why the sharp increase in 2014

Thank you! Questions?

Appendix

Start to Finish – Scope and Structure

- Used ETL project as a starting point, developed different structure/emphasis for history and trip planning
- Refocused after data munging began to just analyzing history
- Resulted with the following structure:

		Brewery Data Used				
HTML Pages	Data Sources/APIs	Est. Date	Location	Revenue	# of Employees	Ratings
Home Page	N/A					
History	NC Department of Commerce Business Search		x			
Brewery Map	NC Department of Commerce Business Search, Yelp API, Google Places API	х	х			х
Data Table	NC Department of Commerce Business Search, Yelp API, Google Places	х	х	x	х	х

Original Data Munging Plan

Gather Data Gathered data/sources: Google Places API, Yelp API, Open Brewery DB, Bureau of Labor Statistics, Four Square

Identify Data We wanted to include brewery types, top beers/beer types, employment stats, ratings, etc.

Transform Data

 Clean data across sources, using brewery name as the point to merge on

Revised Munging Plan

Final Sources Re-focused sources: Google Places API, Yelp API, and NC Department of Commerce

Final Data

 Ended up with data for current revenue, employees, ratings, established data, etc. for 260+ breweries

Transform
Data

Merged data on street addresses due to continuity issues
